TEXTILE PROTECT+ is used to impregnate and protect textile surfaces. It works on the basis of a silane particle emulsion, providing preventive protection and helping preserve treated surfaces. It prevents liquid penetration and makes new stains easier to remove. It protects textiles from oil, ketchup, and other greasy stains, as well as fabric sofas, carpets, tablecloths, awnings, tents, mattresses, work clothes, shoes, aprons, car seats, and many other materials.

ADVANTAGES AND FEATURES

- Strong resistance to dirt on treated surfaces
- Easy to use
- Simple to apply
- Suitable for use in well-ventilated indoor areas

INSTRUCTIONS FOR USE Shake well before use and test on a small, less visible area. **TEXTILE:** Apply the product evenly to the desired, previously cleaned and dry surface using a sprayer. Allow it to absorb and dry completely. The best results appear 24 hours after treatment. Heat accelerates drying. Do not rub new stains. Remove them gently with a dry paper towel to absorb the liquid or rinse with lukewarm water. After removing the stain, reapply the product if needed. Wash tools with water after use. Do not apply the product if the surface or ambient temperature is below 5°C or above 30°C.

TECHNICAL DATA

STATE: Liquid
COLOR: Colorless
ODOR: Mild
SOLUBILITY IN WATER: Complete
COVERAGE: 10–20 m²/L
DENSITY: 0.99 g/cm³
pH VALUE: 5.3

Laboratory test 09/2021-AL

STORAGE Store in a cool, dry, and well-ventilated place. Keep away from heat sources and direct sunlight. Protect from freezing.

DISPOSAL Do not dispose of with household waste. Return to the legal entity that placed the product on the market or hand over to an authorized hazardous waste disposal company.

SHELF LIFE: 12 months after opening.

REQUIRED TOOLS: Roller, brush, sprayer.A

WARNING LABELS H315 Causes skin irritation. H319 Causes serious eye irritation. **[PREVENTION]** P280 Wear protective gloves, protective clothing, eye protection, and face protection. **[RESPONSE]** P302+P352 IF ON SKIN: Wash with plenty of water and soap. P305+P351+P338 IF IN EYES: Rinse carefully with water for several minutes. Remove contact lenses if present and easy to remove. Continue rinsing. P332+P313 If skin irritation occurs, seek medical advice or assistance. P337+P313 If eye irritation persists, seek medical advice or assistance. **[DISPOSAL]** P501 Dispose of contents and container according to national regulations.

FIRST AID After inhalation: Move the person to fresh air. If breathing stops, perform artificial respiration. If dizziness, headache, nausea, or similar symptoms occur, seek medical advice. In case of unconsciousness, place the person on their side, keep airways open, and transport to a hospital. After skin contact: Remove all contaminated clothing and footwear. Rinse affected areas thoroughly with water and mild soap for at least 10 minutes. If symptoms appear or persist, continue decontamination and seek medical advice. After eye contact: Gently separate the eyelids with clean fingers and rinse each eye with a light stream of water for at least 10 minutes (during the first 60 seconds, alternate rinsing each eye quickly). If symptoms appear or persist, continue decontamination and seek medical or ophthalmological advice. After ingestion: Do not induce vomiting. Rinse mouth with water and spit out. Keep the person in a semi-upright position and calm them. Seek medical advice.
